eLicenser Control Version 6.0.2.6001

Release Date

Mac/Win 2009-09-21

New Features

This eLicenser Control (eLC) update introduces a new eLC version format:
<major release>.<minor release>.<patch level>.<build number + eLD state>

- The first three numbers indicate the version: <major release>.<minor release>.<patch level>.
 - For eLC '6.0.2.6001', the version number is '6.0.2'.
- The fourth number's first digit indicates the build number: <build number ...>.
 - For eLC '6.0.2.6001', the build number is '6'.
- The fourth number's last three digits indicate the state of the eLicenser License Database (eLD): <... eLD state>.
 - For eLC '6.0.2.6001', the eLD state is '001'.

Bug Fixes

Win number	eLicenser Control:	Fixed an eLCC issue for copying the Soft-eLicenser's serial into the clipboard.
Mac systems only).	eLicenser Control:	Fixed an issue for accessing older USB-eLicensers on older (on Mac OS X 10.3.9 'Panther' and on Mac OS X 10.4.x 'Tiger'
Win process.	Installer:	Fixed a problem for returning error codes during the installation
Win software.	Installer:	Fixed a problem which prevented further updates of the eLC
